■ LENGTH OVERALL	13.2 m / 43 ft	■ GEARBOXES	ZF 305
■ MAX BEAM	3.7 m / 12 ft	■ DRIVES	Trimax 2200 I
■ MAX HEIGHT	2.10 m / 7 ft	■ PROPELLERS	5 blades Radice Propellers
■ DRY WEIGHT	6700 kg	■ FUEL CAPACITY	1080 l
■ ENGINES	2x625hp FPT CUSROR 9	■ MAX SPEED	65 kn
■ CONTROLS	FB Electronic Throttle	■ RANGE AT 35 KNOTS	320 nm
■ TABS	GPS Electronic Tab System		

Born as an evolution of the Tecno 40, winner of many offshore races, including the Miami-New York, this rigid inflatable boat is considered the best rough water boat in the world. The same boat is in use among many prestigious military corps and special forces (Italy, South Africa, Norway and Hong Kong).

The Buzzi 42' RIB is equipped with the new FB electronic throttle, with features separate throttle and gear controls, for an obvious safety reason. The gears are actuated through switches, which can be both operated by a single hand only, allowing a superior manouvering.

Trim tabs are controlled either manually or automatically, in function of the speed, through an interface with the GPS. The boat is fully laminated in Kevlar 49, it's also equipped with rubber aviation type fuel cells, to avoid tank brake down at high speed. Every single mechanical element in the water is stainless steel, including drives and trim tabs.

Comfort and security are augmented by four FB Design special Tecno Single seats, besides the damping effect, an electrically controlled piston allows variable support depending on the sea conditions, so that the driver can stand up, sit down or adopt any intermediary position. The result: driving comfort and greater safety, even for long use in rough conditions.
